TURNING THE TIDE: PAVING THE WAY
FOR ENERGY POVERTY ALLEVIATION

HEAT CULTURE WORKSHOP

HEAT CULTURE

- What consciously or unconsciously drives adaptation strategies.
- Individual, community and social resources.
- Housing unit, building and urban scales.

“Before we had many strategies, like playing in the street, cooling off in the river and placing chairs right outside the door that are not even possible in the cities today”

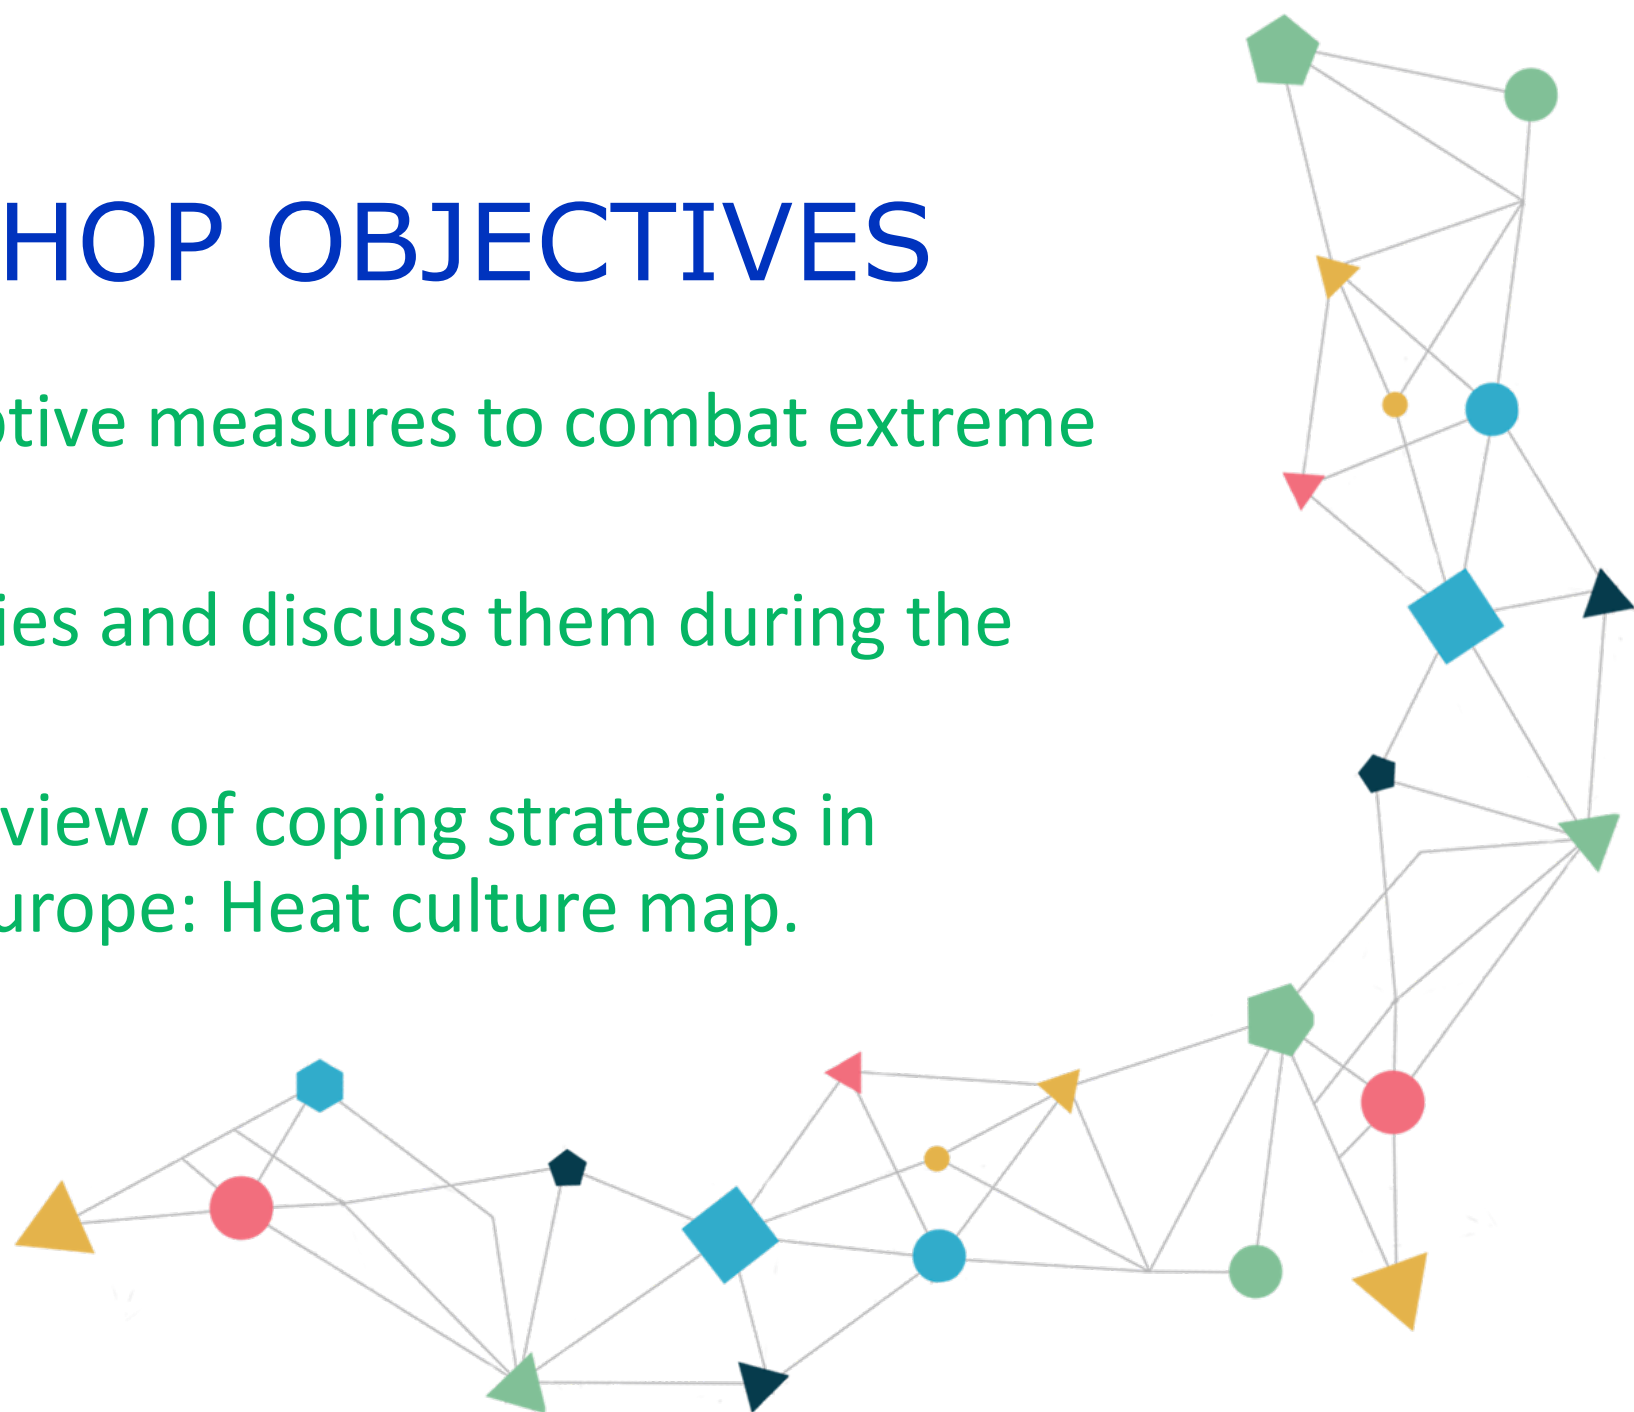

Martín, neighbour (Madrid)

La Ola documentary

WORKSHOP OBJECTIVES

- Share known adaptive measures to combat extreme temperatures.
- Categorize strategies and discuss them during the session.
- Have a broad overview of coping strategies in summer around Europe: Heat culture map.

WORKSHOP GUIDELINES

1. Asking participants to write down activities and strategies during heat wave (color 1).
2. We give a few minutes to cross-review, copy, paste and edit ideas from others (color 2).
3. Participative categorization according to suitability.
+ We distribute by level of adaptation: individual, community or social.
4. Mapping the culture of heat. We link ideas that leverage each other

HEAT CULTURE(S) Workshop

HEAT ADAPTATION STRATEGIES

HEAT CULTURE(S) MAP

User habits	Greenery	Heat insulation	Wear cooling	Radiation	Convection
Water features	Night/day	Shedules	Activities	Climate shelters	Food
Materials

Activities and strategies during heat wave

Participative categorization

Level of adaptation + Mapping the culture of heat.
