

Niepołomice Poland

RESULTS

2nd technical assistance of the Energy Poverty Advisory Hub 2023-2024

October 2023 - July 2024

Energy poverty phase: Implementation

Topics: Energy Communities, Capacity Building, Awareness Raising

Niepołomice, an urban-rural municipality with a population of 30,103, faces significant energy poverty, affecting at least 200 households. The town hall, through its Air Protection Department and eco-advisors, implements programmes and promotes energy efficiency, while also offering social support and addressing energy poverty challenges for incoming Ukrainian refugees.

Objectives

The strategic objectives were:

- supporting the city with the assessment of **baseline** situation.
- supporting the city with **skills** development and capacity building.
- supporting the city with **awareness raising**.
- supporting the city with drafting the **conditions for energy community creation**.

Activities & Outcomes

The technical assistance delivered substantial results by mobilising local actors and providing crucial technical expertise. Collaboration with national institutions and other municipalities, such as Rybnik, enriched the learning experience and offered practical insights into overcoming local challenges.

Future

Support was provided to the local government to effectively **mobilise local stakeholders** and build capacity through training and awareness campaigns. The comprehensive approach, including **practical guidelines and strategic communication**, empowered residents and promoted energy-saving practices and the benefits of energy cooperatives. Niepołomice's involvement in **replication projects** further demonstrated commitment. Key outcomes include the establishment of a campaign targeting energy-vulnerable residents, the organisation of stakeholder workshop, and the creation of baseline for pilot project for an energy cooperative in a multifamily building.

The municipality plans to continue its activities, **supporting residents** in the creation of energy cooperatives and promoting education and awareness.. **Education** remains a key element and will be incorporated into the Municipality's strategic documents.
